simply stylish worktops

Contemporary. Striking. Enduring.

If you're looking for a kitchen as beautiful as it is long-lasting, the Formica Prima® Collection of 34 worktops and ten feature splashbacks offer style and simplicity.

From light woods through to warm stones and solid colours, this captivating suite of designs works with every kitchen space, bringing the latest trends and tastes into the hub of your home.

Every worktop is 38mm thick with a tight curved edge. The collection is perfectly sized with worktops available in 4.1m and 3m lengths, with matching splashbacks and upstands also available. Each one of the five stunning textures has been selected for each worktop, providing the tactility and authenticity that perfectly enhances each design.

This means you can concentrate on the job in hand: creating the dream look for your new kitchen.

Rural Oak *Matte 58 (worktop and matching splashback)*

designing your dream kitchen

Choosing your Formica Prima® worktop has never been easier.

With wood, stone and engineered design palettes expertly matched to the perfect curved edge profile, thickness and texture, you are free to focus on what really matters; finding the perfect design to bring your vision to life.

add the finishing touch

Matching splashbacks for that continuous look.

Whatever your Formica Prima® worktop, there's a splashback and upstand available to match. So the option of creating a seamless look is enticingly easy.

Each of our 34 matching splashbacks are available in 1210mm heights, adding unprecedented functionality, luxury and style to your fresh, new kitchen.

Charcoal Riverstone *Glisten (worktop and matching splashback)*

make it a feature

Feature splashbacks for a striking contrast.

Add an unforgettable flourish to your kitchen with one of ten feature splashbacks. It's the simplest way to create that bespoke finish that leaves a lasting impression.

Choose from contemporary pops of colour or three metallic looks.

sizes and edging

Thickness and edges

All Formica Prima® worktops come in 38mm thickness with a tight curved edge, guaranteeing a sleek and contemporary appearance in every kitchen.

The Perfect Sizes

Even the longest kitchens can be supplied with Prima worktops and breakfast bars. Both are available in 4100mm lengths, while a 3050mm worktop option is also available. All worktops have a 600mm depth. Breakfast bars measure either 670mm or 900mm.

Matching splashbacks and upstands

For the continuous look, matching splashbacks are produced in a 1210mm height, while upstands reach 100mm. Both are supplied in 4100mm lengths.

Feature splashbacks

Make an eye-catching impression with one of our vibrant colours or metallic effect available in either 600mm or 1210mm heights.

Either height is available in 3030mm or 4100mm lengths.

Worktops

3050 x 600 x 38 mm

10 year guarantee of quality

Formica Group warrants to the buyer of a Formica worktop, splashback or upstand that for a period of ten (10) years after installation, it will be reasonably free of defects in materials and workmanship and conform to published data sheets and specifications.

In the event that a product fails to conform to this limited warranty, Formica shall, at its sole option and discretion, either repair or replace such product.

Exclusions. This limited warranty does not cover any damages attributed to causes unrelated to Formica's manufacturing process, including but not limited to incorrect, faulty or improper handling and/or installation, damages caused by unreasonable use, misuse, physical abuse, accidental damage, normal wear and tear, exposure to corrosive elements in the atmosphere, mildew, or the use of harmful cleaning compounds.

Please refer to our Formica Prima® installation and maintenance guides on formica.info for a full list of guidelines, warranties and exclusions.

Please Note:

- The guarantee becomes void once the curved post-formed edge has been cut off
- Due to the inherent properties of gloss, platinum etchings, metallic splashbacks and gloss splashbacks and upstands extreme care should be taken on installation to avoid scratching. Formica Group cannot accept any responsibility for the surface performance of these products if the owner/user fails to follow the installation and care guidelines
- Please consult the installation guide prior to installation

The installation and maintenance guide has been developed for guidance only. Formica Group cannot accept responsibility for the final fitting of your worktop. Colour and surface finish should be checked before installation. Formica Group will not accept any claims for re-fitting costs resulting from mis-matched surface colour or finish. To ensure that your laminate worktop remains in excellent condition, it is essential that all exposed edges of the chipboard are sealed with a silicone sealant or contact adhesive. For a sink cut-out, the exposed raw chipboard should be treated with a water seal or varnish. In addition to this, we would also recommend the use of a purpose made gasket, often supplied with the sink or silicone sealant applied to the perimeter of the sink prior to installation. The hob cut-outs can be protected in the same way but it is also advisable to cover the exposed edges and the edge of the laminate with aluminium foil, to prevent the heat affecting the cut-out.
